AutoBooth

What is AutoBooth

Transform your digital showroom into something extraordinary

AutoBooth is an advanced tech feature of the CarshopHUB that will enhance your vehicle images onto your chosen backdrop. No need for an expensive photobooth or camera equipment. You can even take a pic of your vehicle in the wash bay. Professional, cost effective & it's all automated.

How AutoBooth Works

Transform your digital showroom into something extraordinary

- On CarshopHUB you can select which photos, for each of your vehicles you wish to have edited.
- The photos will be sent to you on CarshopHUB, populating your stock, or sent to you via email for you to update your images.
- AutoBooth professionally etches out the vehicles and places them onto the background of your choice.
- Once all your images have been edited and updated, your customers can enjoy them on CarshopHUB and your advertising platforms.

Backgrounds

Transform your digital showroom into something extraordinary

Choose the background you want to have behind your vehicles or take a picture of your dealership to highlight your brand & stock. Images play an important role in attracting clients to view your vehicles...
